School Bus Tracking
with app for parents

Automated ascent and
descent for children
Automated attendance
access control

GPS trackers for hire for
children on a trip

School Bus Tracking

Track4People has created the first professional portable kit for real-time tracking of the bus for transporting children. Families access the App via their smartphone and monitor the route of the bus on which their child travels.

Automatic detection of the presence of the child on board the bus

The child's boarding and alighting on board the bus is detected by a technological device which, through Track4People, notifies parents and the school office of its presence.

App for Families

"Family" access to the Track4People platform

Alert reception at the departure of the bus

Child ascent and descent notifications

Real-time bus tracking

Free download on Apple Store

Free download on Google Play

Web platform and App for the school

The school accesses the platform and checks the route of its buses. View the list of children who gradually get on and off the bus.

GPS tracker rental service for children on a school trip

Track4People allows you to monitor the progress of the trip and view the position of all children and teachers on the map to ensure maximum safety for each trip. The teacher uses the App from his smartphone and the school has full control through the web platform.
